This chart shows the number of single-family demolition permits issued in Princeton from 2005 through July 2016. During this time, 218 single-family home demolition permits were issued in Princeton excluding the thirteen 2013 demolitions on Alexander Street by Princeton University.

This data was obtained from the Princeton Building Department and geocoded by the project team to help analyze spatial patterns and identify other trends. Multiple demolition permits issued for the same lot and typically in the same year were omitted from this analysis.

LOCATION OF SINGLE-FAMILY HOME DEMOLITIONS - PRINCETON, NJ (2005-2016)*

This map shows the location of single-family home demolitions in Princeton, NJ from 2005 through July 2016. The demolitions of single family homes are concentrated in the central and eastern parts of Princeton with a small cluster near Greenway Meadows. On some streets, such as Random Road, Snowden Lane and Jefferson Road, a string of adjacent houses have been demolished.

This data was obtained from the Princeton Building Department and geocoded by the project team to help analyze spatial patterns and identify other trends. Multiple demolitions permits issued for the same lot and typically in the same year were omitted from this analysis

LOCATION & SIZE OF HOME ADDITIONS - PRINCETON, NJ (2005-2015)

This map shows the location and size of home addition permits issued from 2005 – 2015. Overall, the spatial patterns on this map resemble those on the map of demolitions. Large additions are being undertaken in the same general areas/zoning districts as the demolitions.

This data was obtained from the Princeton Building Department and geocoded by the project team to help analyze spatial patterns and identify other trends. Very small home additions (smaller than 500 s.f.) such as bathroom renovations, patio expansions etc. and additions with missing information are omitted from this analysis.

LOCATION OF SINGLE-FAMILY HOME DEMOLITIONS & ZONING DISTRICTS - PRINCETON, NJ (2005-2016)*

The majority of the single-family demolitions are clustered in the former township's R-4, R-5 & R-6 zoning districts. Parcels in these zoning districts are, typically, half-acre and smaller lots. There is also a concentration in the Borough R-1, R-2 and R-4 district, which are also, typically, half-acre and smaller parcels. There is a smaller cluster within the former Township's R-2 zoning district.

There are fewer demolitions taking place in other zoning districts. A higher density of demolitions tends to occur in smaller lot subdivisions that are in districts that are established between 1930 and 1970 where there is "latent capacity" in the zoning bulk regulations.
